

The Listowel Memorial Hospital will be embarking on a Laboratory Renovation starting August 12, 2019.

This work will result in a temporary **closure** of the Outpatient Laboratory Services.

This affects “walk-in patients” including those individuals who are not currently Inpatients or registered to a hospital clinic or the Emergency Department.

Please have your bloodwork completed at the Listowel Lifelab location at 185 Inkerman Street East, Listowel.

Alternate private laboratories for community specimen collection are available locally. Lifelab locations in Stratford, Seaforth, Milverton, Kitchener-Waterloo, and Mitchell. Dynacare locations in Stratford, Goderich, Seaforth, and Kitchener. Private lab location Royal Oaks, Wingham.

We apologize for any inconvenience and appreciate your patience.

If you have any questions or concerns please contact
